

pMDI 2.3 Fn

2.3 Fn pMDI is a lower functionality polymeric MDI. It contains a higher percentage of pure MDI which results in a lower viscosity and a slower gel time. The slower gel time provides a wider latitude for molded products or any application where improved flow characteristics are required.

Typical Properties

<u>Property</u>	<u>Value</u>
% NCO	32.0%
Functionality	2.3
Specific Gravity	1.23
Acidity (as HCL)	< 0.05%
Viscosity at 25 C	~ 60 cps
